

Step-by-Step Guide to:

Investing in **BIG** Token

6 STEPS TO INVEST IN BIG TOKEN

- ✓ [Step 1: Creating an Ethereum wallet](#)

- ✓ [Step 2: Get Whitelisted](#)

- ✓ [Step 3: Create an Account on a Cryptoexchange](#)

- ✓ [Step 4: Transfer Money to the Cryptoexchange](#)

- ✓ [Step 5: Buying Ethereum](#)

- ✓ [Step 6: Buying BIG Tokens](#)

- ✓ [\(Optional\) Checking Your BIG Tokens](#)

Creating an Ethereum Wallet

1 - Go to <https://www.myetherwallet.com>

Please read the introduction on the website carefully

2 – Enter a password (and remember the password) then click **“Create New Wallet”**

A screenshot of the "Create New Wallet" page. At the top, it says "Create New Wallet". Below that is a section titled "Enter a password" with a text input field containing the placeholder "Do NOT forget to save this!". To the right of the input field is an eye icon for toggling password visibility. Below the input field is a blue button labeled "Create New Wallet". At the bottom, there is a warning: "This password encrypts your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet." and two links: "How to Create a Wallet" and "Getting Started".

3 – Click **“Download Keystore File”** and then once downloaded, click **“I understand, continue”**

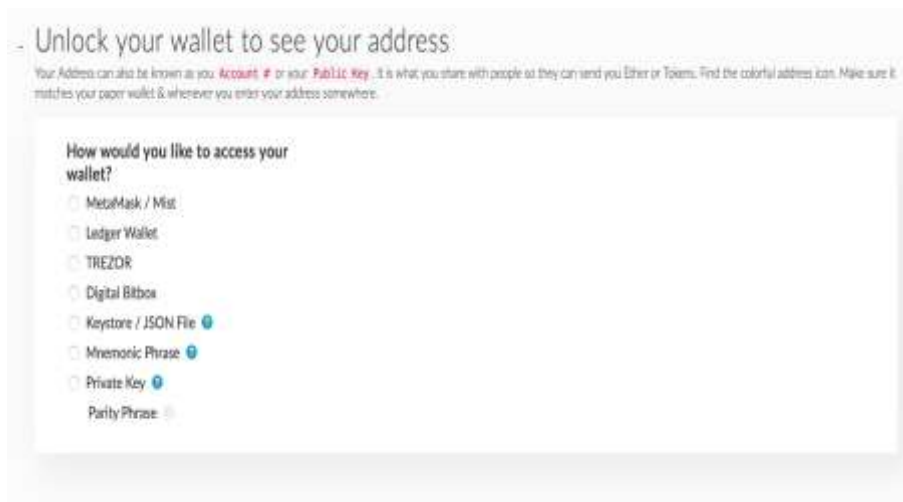

A screenshot of the "Save your Keystore File" page. At the top, it says "Save your Keystore File." Below that is a blue button labeled "Download Keystore File (UTC / JSON)". Underneath, there are three lines of warning text: "**Do not lose it!** It cannot be recovered if you lose it.", "**Do not share it!** Your funds will be stolen if you use this file on a malicious/phishing site.", and "**Make a backup!** Secure it like the millions of dollars it may one day be worth." At the bottom is a red button labeled "I understand, Continue".

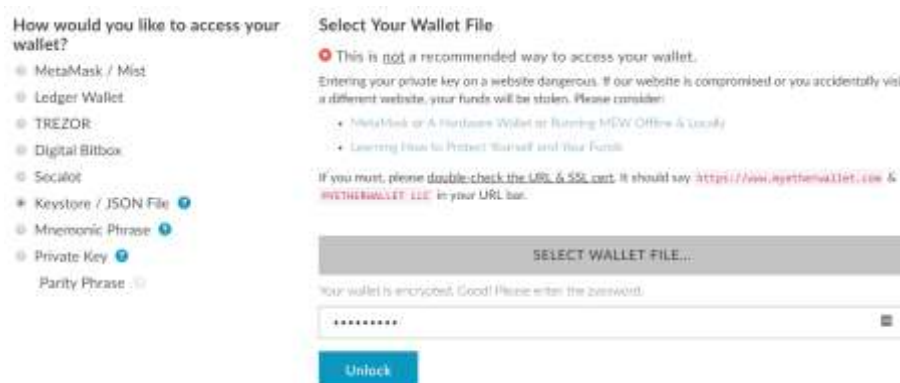

4 – Copy and Save the Private Key in a safe place. And then click “Save your address”

5 – Now you created the wallet successfully. There are several options to unlock your wallet, but we recommend that you unlock your wallet using the “Keystore / JSON File” option.

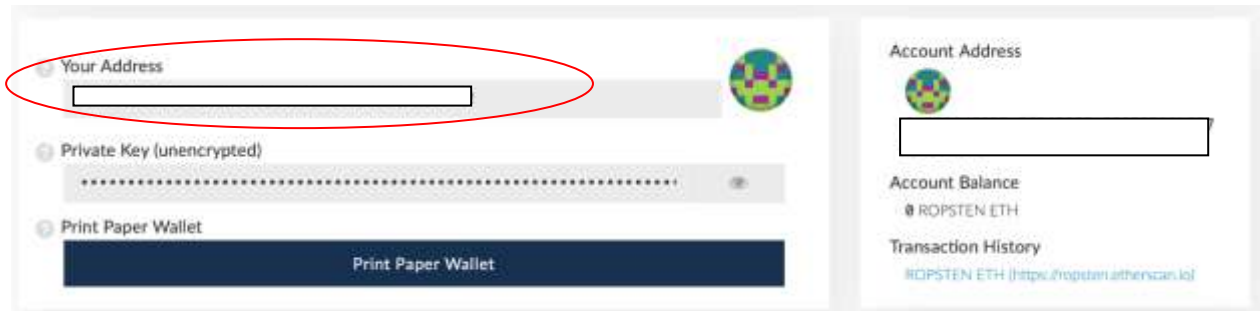

6 – Choose “Select Wallet File” and locate the file starting with UTC on your device. Enter your password. Then press “Unlock”.

7 – Scroll down and you can see your wallet address. This wallet address is for you to:

- a. send ETH to pay for something
- b. store your ETH
- c. Receive and store your BIG Token

Make sure you keep the following in secured files/places:

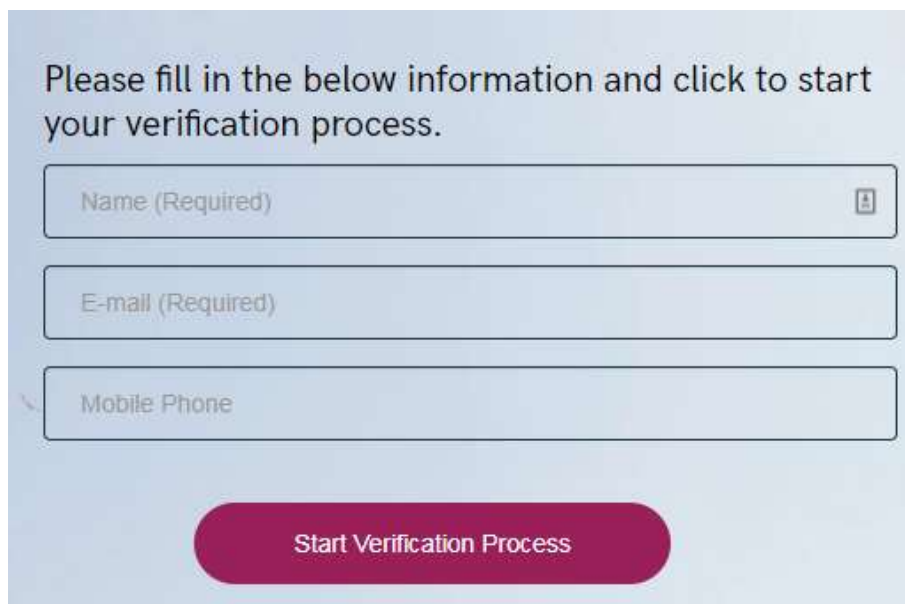

1. password (from step 2)
2. keystore file (from step 3)
3. private key (from step 4)
4. account address (from step 7)

The ethereum wallet is so secure that if you lost your credentials, no one can recover and you will never get access to your wallet (and any cryptocurrencies in it) again.

Get Whitelisted

1 – Go to <https://www.bigtk.io/join-ico.html> on your mobile device.

2 – Type in your Name, Email and select **“Start Verification Process”**.

Please fill in the below information and click to start your verification process.

Name (Required) 

E-mail (Required)

Mobile Phone

Start Verification Process

3 – On the top right, choose the language you prefer. Then select **“Individual”** to start the verification process.

 Verify your identity    

Complete the form below to verify your identity and allow you to participate in the ICO. You will be required to enter some personal information and then upload two identity documents to allow us to match your identity. Finally at the end we will show your verification status.

Completing these steps should take no more than 5 minutes.

Choose entity type

 Select this option if you will be participating as an individual

INDIVIDUAL

 Select this option if you will be participating on behalf of a company

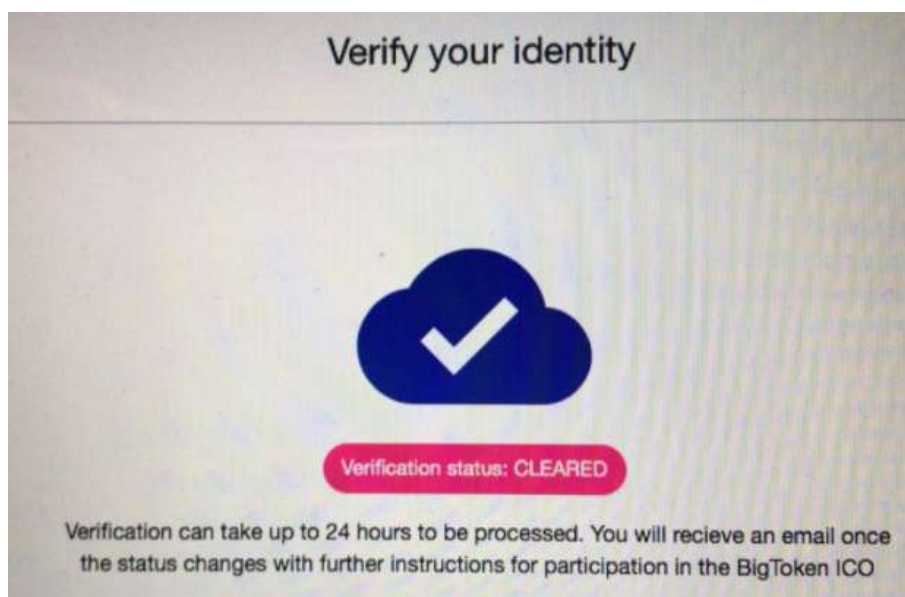

CORPORATE

4 – You will then be required to take a picture of your identity document. We recommend that you use your passport as your identity document.

5 – You will also be required to take a photo of yourself holding the identity document next to you.

6 – Finally you will be brought to a page that says **Verification status: CLEARED**

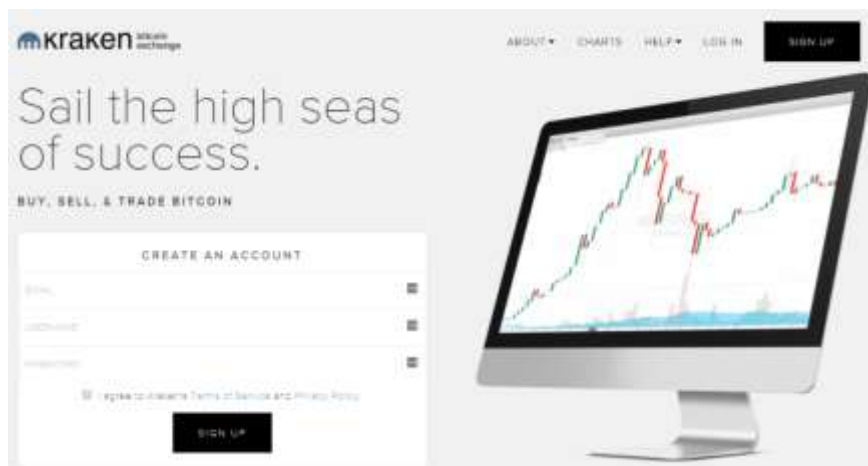

7 – If you are having difficulties with clearing your whitelisting, drop us an email at support@bigtk.io and we will assist you.

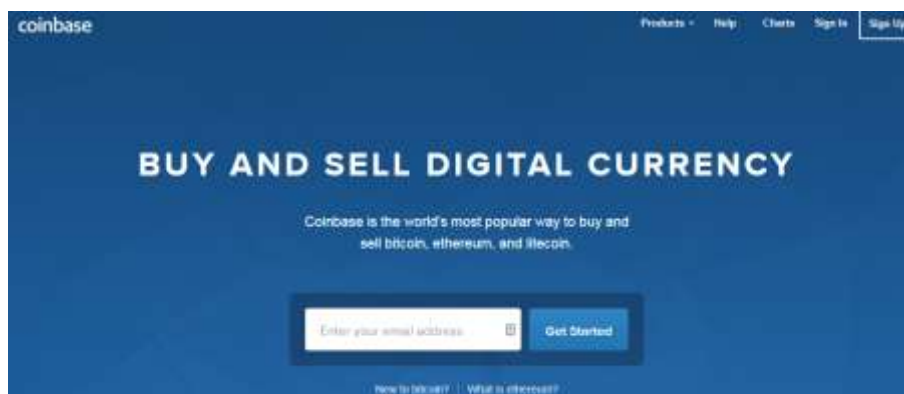

Create an Account on a Cryptoexchange

There are many cryptoexchanges around the world where you can buy Ethereum from. Here we list some of the more popular ones for your reference. Follow their instructions to start an account with them.

[KRAKEN](#)

[COINBASE](#)

[CEX](#)

[Buy Ethereum with VISA or Mastercard](#)

Example: Account Opening with Kraken

1 – Go to <https://www.kraken.com/>

2 – Fill up the information under **“Create an account”**.

A screenshot of the Kraken Bitcoin exchange website's account creation page. The page has a light gray background. At the top left is the Kraken logo with the text "kraken bitcoin exchange". Below the logo is the headline "Sail the high seas of success." and the sub-headline "BUY, SELL, & TRADE BITCOIN". The main content area is a white box titled "CREATE AN ACCOUNT". It contains three input fields: "EMAIL", "USERNAME", and "PASSWORD", each with a small eye icon to its right. Below the fields is a checkbox labeled "I agree to Kraken's Terms of Service and Privacy Policy". At the bottom center of the white box is a black button with the text "SIGN UP" in white.

3 – Fill up and continue to **“Sign up”**. You can leave the optional fields **Master Key** and **PGP Public Key** blank.

CREATE ACCOUNT

Password must be at least 8 characters

State/Province is required

Username

First Name

Last Name

Password must be at least 8 characters in length and contain letters, numbers, and special characters.

Master Key
Master Key (optional)

Add a passphrase, phrase, or PIN to improve account security. What's that?

PGP Public Key
PGP Public Key (optional)

Copy/paste your public key to receive encrypted email. What's that?

I agree to Kraken's [Terms of Service](#) and [Privacy Policy](#).

SIGN UP Advanced options

4 – Go to your email and click on the link to activate your account.

Kraken <noreply@kraken.com>
to me

Thanks for signing up at Kraken!

After activating your account, please check your email again for an important message explaining the services we can offer in your country or state.

Activate your account by visiting the following link:

<https://www.kraken.com/activate-account?>

You can also go to <https://www.kraken.com/activate-account> and manually enter your activation key:

If you are not able to complete the account activation process due to a forgotten username or password, you may cancel this pending activation and free up this email address for a new registration by going here:

https://www.kraken.com/cancel-signup?key=H1QY47EaG_RL_rvki0top

Thanks,
The Kraken Team

5 – The activation key will be pre-filled for you. Enter your credentials to activate your account.

ACCOUNT ACTIVATION

Enter the activation key entered to you at sign up.

ACTIVATE ACCOUNT

Cancel your pending account activation

6 – Click on **“Get Verified”**.

Welcome to Kraken!

Thanks for signing up! To deposit, trade, and withdraw funds please [get verified](#).
Please refer to your confirmation email for any service restrictions related to your jurisdiction.

7 – You need to at least get verified for Tier 2 (daily cash deposit limit of \$2,000 and monthly cash deposit limit of \$10,000). If you want higher daily and monthly limits, go for verification of higher tiers.

Scroll down and select **“Tier 1”**. Fill up your personal particulars and click on **“Get Verified”**.

Tier 1 Tier 2* Tier 3 Tier 4

Fill out the form below to get Tier 1 verified. All fields marked * are required.

Full Name * *

IMPORTANT: once submitted, full name cannot be changed. Please ensure the spelling is correct.

Date of birth * * *

IMPORTANT: once submitted, your date of birth cannot be changed. Please ensure the correct date is selected.

Country/Territory *

Phone Number * *

Enter your phone number and select type.
For your convenience, a default international country code is set for your selected country.

Get Verified

*Clients will be required to provide an ID confirmation photo in addition to reaching Tier 3 verification if they are:

- Resident in Germany or Japan
- Funding using a German or Japanese bank account
- Using domestic USD funding

Please see [here](#) for details of the ID confirmation photo.

8 – Now we can proceed with Tier 2 verification. Click on **“Get Tier 2 verified”**.

Tier 1 Tier 2* Tier 3 Tier 4

✓ Thanks for applying for Tier 1 verification!
Your information has been submitted, and will be processed shortly.

Do you want to continue and apply for Tier 2 verification?

Get Tier 2 verified »

No thanks

9 – Continue to fill up your personal particulars and click on **“Get Verified”**.

Tier 1 Tier 2* Tier 3 Tier 4

Fill out the form below to get Tier 2 verified. All fields marked * are required.

Address Line 1

Transfer Money to the Cryptoexchange

Once you have successfully created an account with the cryptoexchange of your choice, the exchange should provide you with instructions on how to transfer funds to the cryptoexchange's bank account.

Please check with your cryptoexchange on the currencies accepted, details of their bank account, fees and transfer limits. Do note that if it is a bank transfer, it may take a few working days for your funds to reach the cryptoexchange.

Buying Ethereum

After a successful fund transfer to the cryptoexchange's bank account, you should find that your account with the cryptoexchange has funds in it. Typically, cryptoexchanges priced ETH in US Dollars under the ETH/USD pair. Otherwise, your local cryptoexchange may also priced ETH in local currency such as ETH/JPY or ETH/THB.

The price of ETH will fluctuate depending on the date and time that you trade.

The ETH purchased will be deposited in your wallet with the cryptoexchange.

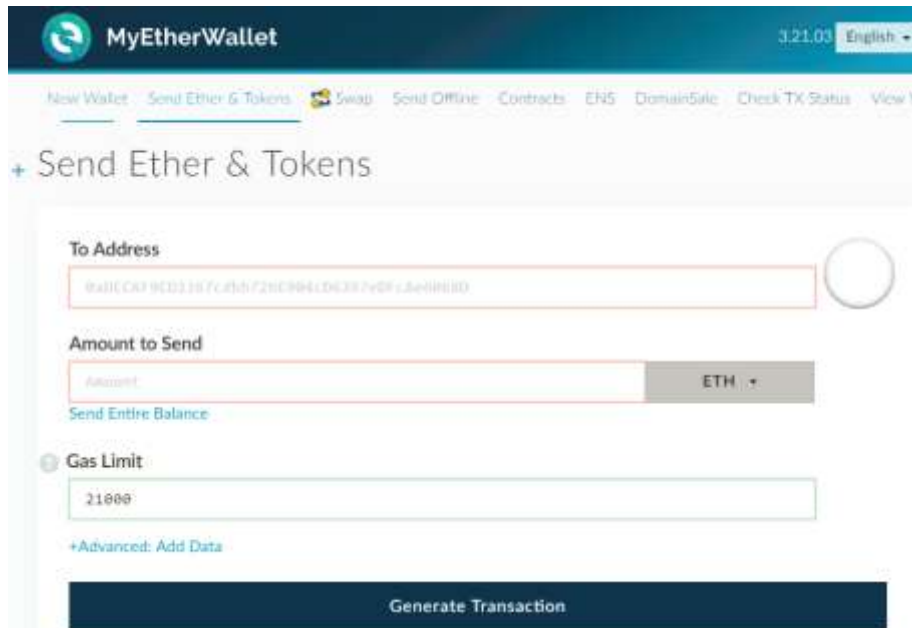

Next, you will need to send the ETH from your exchange wallet to your wallet created in [Step 1: Creating an Ethereum Wallet](#).

A very small amount of ETH is required as a processing fee to initiate this transfer.

Buying BIG Tokens

1 – Go to <https://www.myetherwallet.com>

2 – Unlock your ether wallet (See [Step 1: Creating an Ethereum Wallet](#) if you are unsure).

A screenshot of the MyEtherWallet website's "Send Ether & Tokens" interface. The page has a teal header with the MyEtherWallet logo and version 3.21.03. Below the header is a navigation bar with links for "New Wallet", "Send Ether & Tokens", "Swap", "Send Offline", "Contracts", "ENS", "DomainSale", "Check TX Status", and "View V". The main content area is titled "+ Send Ether & Tokens" and contains three input fields: "To Address" with a red border and a circular refresh icon, "Amount to Send" with a dropdown menu set to "ETH", and "Gas Limit" with the value "21000". A "+Advanced: Add Data" link is visible below the Gas Limit field. At the bottom of the form is a dark blue button labeled "Generate Transaction".

3 – Under Send “**Ether & Tokens**”, enter the following information:

To Address: `0x2f4330E833c76860EA54F15b0195Ff80A2c519C4`

Amount to Send: How many ETH you want to send. Our minimum transaction is 2 ETH.

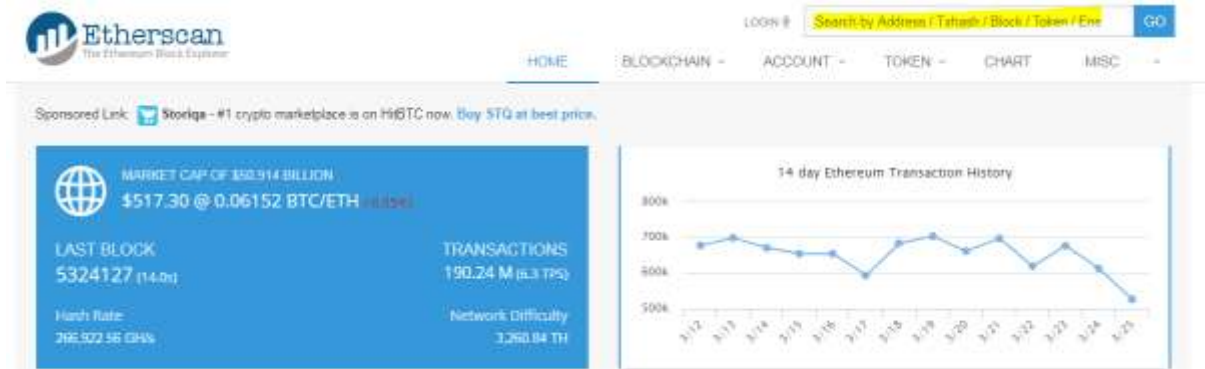

Click on “**Generate Transaction**”.

4 – You have now successfully purchased BIG Tokens!

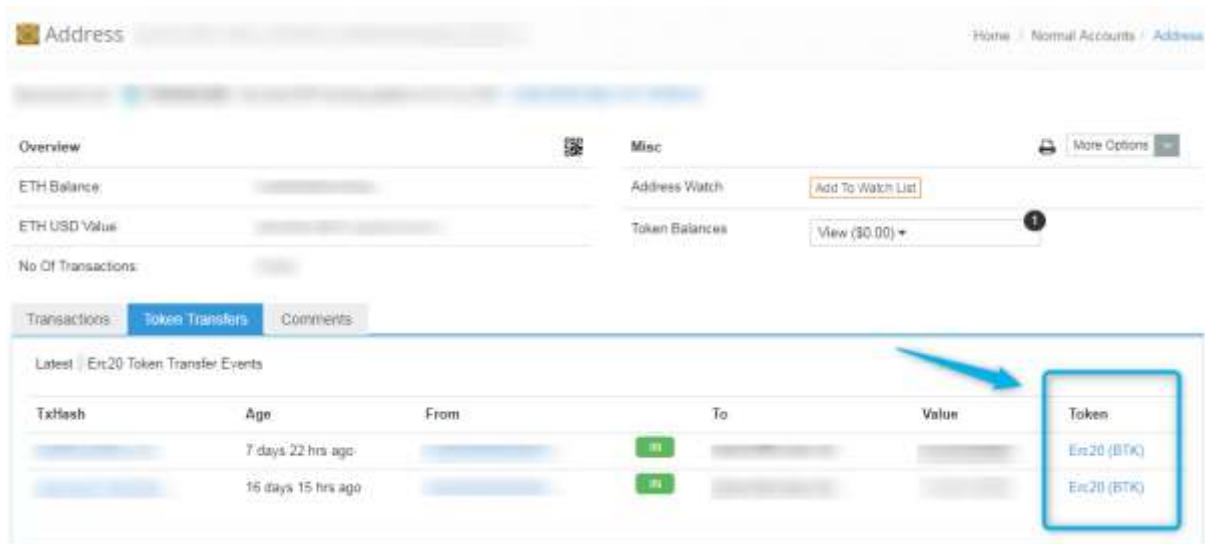

Checking Your BIG Tokens

1 – Go to <https://etherscan.io>

2 – Enter your ether wallet address that you have created in [Step 1: Creating an Ethereum Wallet](#) in the Search bar on the top right. Click on “Go”.

3 – Under “Token Transfers”, you can see the amount (“Value”) of BIG Tokens (Erc20 (BTK)) you have purchased. BTK is the token symbol of BIG Tokens.

The screenshot shows the Etherscan website interface for a specific address. The address is partially visible at the top. Below the address, there are tabs for "Overview", "Misc", and "More Options". The "Overview" tab is selected. Under "Overview", there are fields for "ETH Balance", "ETH USD Value", and "No Of Transactions". Under "Misc", there are fields for "Address Watch" (with an "Add To Watch List" button) and "Token Balances" (with a "View (\$0.00)" dropdown). Below the overview, there are tabs for "Transactions", "Token Transfers", and "Comments". The "Token Transfers" tab is selected. Under "Token Transfers", there is a table showing "Latest | Erc20 Token Transfer Events". The table has columns for "TxHash", "Age", "From", "To", "Value", and "Token". A blue arrow points to the "Token" column, which contains "Erc20 (BTK)" for two entries. The first entry is "7 days 22 hrs ago" and the second is "16 days 15 hrs ago".

TxHash	Age	From	To	Value	Token
	7 days 22 hrs ago				Erc20 (BTK)
	16 days 15 hrs ago				Erc20 (BTK)
